TMX TRAYPORT

TMX TRAYPORT

Trayport FX Feed

Powered by Morningstar's trusted feed, easily convert currencies using the latest spot and future rates.

Combined with Tradesignal's inbuilt unit conversion, easily:

» Analyse the coupling between European natural gas and LNG in $/MMBtu

» Chart the historical spread between NBP and TTF Hi Cal 51.6 in €/MWh

» Calculate the spark spread for Japanese power against JKM in ¥/kWh

» Create custom formula symbols incorporating currency and unit conversion, or apply indicators and strategies to pre-converted symbols

» Spot and forward FX rates can be used for more suitable conversion, with multiple forward rate calculations available to suit the contract type and maturity

» The latest rates are received in real-time and applied bar-by-bar to effortlessly keep charts & conversions updated throughout the day

Tradesignal Pro

Bridging the gap between strategy and action.

By linking Tradesignal charts directly to our execution system, we've cut out manual steps to make your trading faster and smoother.

Key Features

» **Smart Automated Trading:** Your strategy's signals are automatically turned into the right type of order.

» **No more manual typing:** By removing the need to enter trade details by hand, you work faster and avoid costly typos.

» **Everything in One View:** You can track all your live trades and current positions in real-time on one screen

» **Safe and Secure:** Utilises full MiFID II compliance and automated risk rules, keeping your trading safe and compliant with industry regulations.
